Presently, this facility has one principal customer - Globe Industries. Agencies and customers will be notified a minimum of ninety days prior to the last day of receipt of waste material.

A total of 122,740 cubic yards of cover soils is required for total closure. Approximately six acres have been partially closed. The Area is indicated Area A on the attached plot plan. Approximately 103,400 cubic yards are available on site and is sufficient for final closure. If required, additional cover is available from land under control of the permittee located adjacent to landfill immediately to the South of State Road No. 2. Final cover will be two feet of clay compacted with earthmoving equipment and rollers. Clay will be placed in nine inch layers prior to compaction. Compaction will be 90% proctor density.

Although top soil is not required, the permittee by practice does provide sufficient top soil to produce vegetation quickly.

Final vegetation will be by hydroseeding (including mulch).

Final contour will be staked by a registered Land Surveyor and upon completion as-built plans will be prepared by a registered Land Surveyor.

Feddeler Solid Fill Site

The request to deposit new waste materials, received by this office on January 27, 1993, at the above-referenced site, has been reviewed. The request concerns the proposed disposal of waste material from Commercial Waste Systems, Inc., at Feddeler Solid Fill Site.

Upon review, staff has determined that the materials proposed for disposal are not compatible with this type of site and should not be disposed of at any time. To expand the approval for this site to accept such waste would require upgrading the site, involving extensive engineering and geological work.

If you have any questions regarding this matter, please call Ms. Daniela Klesmith at (317) 232-8840.

Dear Mr. O'Drobinak:

Be advised according to Community-Panel Number 180126 1045, effective September 2, 1981 (enclosed), the extreme southeast corner of the parcel is the only portion of the property located within a designated flood area. I do not believe any structures currently exist within the flood area on this property.

Re: Clarification of Permit Renewal and  
Closure/Post-closure Requirements

Dear Mr. Feddeler:

The Office of Solid and Hazardous Waste Management would like to clarify recent concerns about the permit renewal application (submitted April 13, 1986) and the requirement per 329 IAC 2 that closure/post-closure plans and proof of a financial assurance mechanism be submitted to our agency.

Our office has evaluated the information on file relative to chemical analysis of the insulation material. All required chemical information has been submitted and no additional information is required. However, relative to our letter of April 13, 1989, concerning the permit renewal the letter from the Department of Natural Resources verifying that this site is not in a floodplain has still not been submitted and should be.

The urgent need for an in-place financial assurance mechanism and closure/post-closure plans, however, should not be underestimated. These were required to be submitted before September 1, 1989. A reminder letter was sent on October 29, 1990. Failure to submit these will very likely result in enforcement action. It should also be understood that proof of a financial assurance mechanism and closure/post-closure plans can be submitted independent of technical information requests.

An Equal Opportunity Employer

Mr. Feddeler  
Page 2

Additionally, per House Enrolled Act 1472 which was passed into law on March 20, 1990, a good character disclosure must be submitted before the review of the renewal application can be completed. If you have any further questions please call Mr. Stuart Miller of this office at AC 317/232-7206 .

Re: Letter of Warning

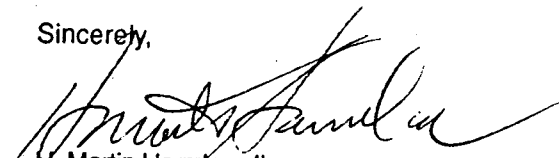

Dear Mr. Feddeler:

On February 11, 1989, the Indiana Solid Waste Regulations (329 IAC 2) became effective. In section 1(c) of Rule 12 [329 IAC 2-12-1(c)], the regulation states that a solid waste land disposal facility shall not "operate after September 1, 1989, unless, prior to that date, they have established financial responsibility by choosing a financial assurance mechanism under section 3(a) of this rule and by funding the same under section 3(b) of this rule."

The Office of Solid and Hazardous Waste Management has completed a file review and has determined that the Feddeler Solid Fill Site has not complied with 329 IAC 2-12-1(c). Therefore, you shall comply fully with the requirements of 329 IAC 2-12-1(c) within thirty (30) days of the receipt of this letter. Failure to comply with the financial responsibility requirements will result in the issuance of a Notice of Violation and proposed Agreed Order which will recommend a financial penalty. The proposed Agreed Order may also recommend the rescission of the Feddeler Solid Fill Site operating permit and require the immediate closure of the facility.

If the Office of Solid and Hazardous Waste Management may be of assistance in complying with the requirements of 329 IAC 2-12-1(c), please contact Mr. Kevin Hogan. Mr. Hogan may be contacted at Room 925, 105 South Meridian Street, P. O. Box 6015, Indianapolis, Indiana 46206-6015, or by telephone at 317/232-3412.

Re: Operating Permit Renewal  
Request for Additional Information  
Feddeler Solid Fill Site  
Lake County

Dear Mr. Feddeler:

In a letter from our agency dated August 19, 1986, five (5) sets of information regarding your landfill or the generator of the waste which you receive were requested: (1) a description and flow diagram of your generator's manufacturing processes, (2) a list of the annual quantities of waste generated, (3) a description of the raw materials used by Globe (including material safety data sheets), (4) a description of the processing chemicals used in the formulation or fabrication of Globe insulation materials, and (5) information to verify that your landfill is not within a 100-year frequency floodplain and/or floodway.

To date Items 1, 2, and 3 have been recieved. Item 4 has not been received and needs to submitted. In regards to Item 5, a mere statement (such as in Mr. John M. O'Drobinak's October 15, 1986, letter) is inadequate verification that your landfill site is not within the 100-year frequency floodplain and/or floodway. You must submit either a revised plot plan showing the extent of the floodway and/or floodplain or a letter from the Department of Natural Resources verifying this matter. This information can be obtained by contacting the DNR's Division of Water at 317/232-4160.

Your prompt attention to these items will hasten the review process. Staff will review the information provided and may require further testing to characterize each waste stream and to demonstrate that the wastes have minimal environmental impact.

Mr. Thomas R. Feddeler, President

If you have questions regarding information which is required for your application, contact Mr. Duane Leith of this office at 317/232-8858. General questions about the permit application and review process can be answered by calling Mr. Jerome Rud at 317/232-7200.

Sincerely,

Re: Permittee-Feddeler Enterprises, Inc.  
(Formerly Feddeler Land Fill)

Dear Mr. Hogan:

My above named Client, Feddeler Enterprises, Inc., has forwarded to me the copy of the Notice of Financial Responsibility Requirements for Solid Waste Land Disposal Facility Permittees. I have reviewed this, and it would appear that these requirements apply to my Client who operates a solid fill site in Lake County, Indiana.

In October, 1986, an application was filed with your Department to transfer the permit from Feddeler Land Fill to Feddeler Enterprises, Inc.. I note that the correspondence that was sent was addressed to Mr. Edward Feddeler, Feddeler Solid Fill Site. We have assumed, since we have nothing to the contrary, that the operating permit, Number 45-8, now rests in the name of the new permittee, Feddeler Enterprises, Inc.. We have never been notified of anything to the contrary, and in fact, have forwarded additional documentation and information which was requested at the time that the application was submitted.

Besides the above matter, we are requesting that you provide us with copies of the suggested formats for the Trust Fund, Surety Bond, Letter of Credit, and Insurance. Since we are not certain which of these options we would like to pursue, we are requesting copies of all of them so that we may make our own evaluation. Please forward the necessary copies to me, as the Attorney for the Permittee.

If there are any questions concerning any of the matters raised by my letter, I would appreciate you or someone on your behalf contacting me immediately.
